

# Containment Simulation Executive Summary — run\_019

| Experiment Metric    | Observed Simulation Value                                   |
|----------------------|-------------------------------------------------------------|
| Run ID               | run_019                                                     |
| Workflow             | workflow_executive_to_operations_to_research_to_executive   |
| Compromised Agent    | Executive Strategy                                          |
| Runtime $\tau_{FVS}$ | 3                                                           |
| FVS Size             | 3                                                           |
| Active Agents        | 9                                                           |
| Active Edges         | 15                                                          |
| SCC Count            | 1                                                           |
| Largest SCC Size     | 9                                                           |
| Infected Before      | 8                                                           |
| Infected After       | 0                                                           |
| Containment Ratio    | 100.0%                                                      |
| Containment Gain     | 8 agents                                                    |
| Propagation Depth    | 6 -> 0 (Reduction: 6 hops)                                  |
| Graph Hash           | 813e55fb1ad4a6d1b342b971c6056e400e60369e0498b7173ed9ac5a2f2 |
